

WORKSHOP SESSION

Institutions, markets, regulation and local development

15 October, 2015 – 9.30am

Palazzo Cisterna, Sala Consiglieri, Via Maria Vittoria 12, Torino

The panel will explore the peculiarities of the local dimension of regulation of public services - with particular reference to local services such as water and sanitation, urban waste, energy distribution – and will stimulate some reflection upon how the results of the academic research on regulation can support local policy makers and improve local policies. Attention will be devoted also to the peculiarities of industrialized countries on one side and developing countries and emerging economies on the other side, considering that in the last twenty years the latter faced a push toward liberalization and privatization of public services, often accompanied by a transfer of regulatory models from industrialized countries, where in many cases such transfer has not been able to integrate with existing institutional, social and judicial frameworks. Finally, the FIELD methodology developed by the Turin School of Local Regulation (www.turinschool.eu/FIELD) to support local decision makers in the analysis of actors, incentives, information endowment and transfer will be briefly presented in order to provide a tool to frame the context of any regulatory reform and take more informed decisions.

CITTA DI TORINO

Franco BECCHIS, Turin School of Local Regulation

Scientific director of Fondazione per l'Ambiente since its creation and Scientific Director of the initiative "Turin School of Local Regulation", he coordinates research programmes on the interaction between economics, energy and environment and on local public services, as well as capacity building and support activities for local public entities. He is author and editor of the forthcoming handbook "The political economy of local regulation" published by Palgrave Macmillan. He has been contract Professor in Environmental Economics at the Polytechnic of Torino, University of East Piedmont and Saint John International University. His scientific interests and his publications range from public economics to environmental and regulatory economics.

Giorgio BROSI, University of Torino

Giorgio Brosio is Professor of Public Economics at the University of Torino, Italy. He has been professor at the Universities of Bari, Italy, and Geneva, Switzerland. He has been the President of the Società Italiana di Economia Pubblica (Italian Public Economics Association) from 2009 to 2012 and is still member of the Board and was President of the European Public Choice Association (April 1992 - April 1993) and member of the Board until 1999. He has worked as a consultant for international institutions (mostly the IMF, the EU, the IADB and the WB) on public sector reform and development, with particular emphasis on taxation, natural resources and decentralization issues.

Marco CANIATO, COOPI

Marco is an environmental engineer with a special focus on humanitarian and development work. He has got both theoretical and practical skills, through academic courses and work experience in different countries in Balkans, Africa, Asia and Middle East. He defended his PhD in March, 2014, with a thesis about health-care waste management in areas with severe constraints. He worked as a consultant for NGOs in different countries in energy and WASH projects. Currently he is Innovation Advisor in the SET4food project working for COOPI (cooperazione internazionale). Finally he represents COOPI in Technology & Innovation and Programme Quality Working Groups of the Global Food Security Cluster.

Karen MAGUIRE, OECD

Ms. Maguire is a Counsellor in the OECD's Regional Development Policy Division and Project Manager for Regional Development and Innovation. In addition to research on a wide range of regional development issues, she has a particular focus on policies to promote regional economic development, innovation systems and clusters. She co-ordinates the biennial *OECD Regional Outlook* and is the main author of several other OECD publications, including *Regions and Innovation: Collaborating Across Borders*; *Regions and Innovation Policy* and *Competitive Regional Clusters: National Policy Approaches*. She manages the series of OECD Regional Innovation Reviews conducted in numerous OECD regions. Prior to joining the OECD, Ms. Maguire worked as an investment banker for UBS in New York, an international consultant in economic development and a research analyst for the Urban Institute in Washington, D.C.

Daniele RUSSOLILLO, Turin School of Local Regulation

Mr. Daniele Russolillo is Program Manager at Fondazione per l'Ambiente - Turin School of Local Regulation in Turin, Italy. He has 10 years experience in managing national and international projects on energy economics, environmental policies and economic regulation of local public services. He has a proved experience in capacity building and stakeholder analysis projects at international level, with specific attention to emerging and developing countries. He's part of the workgroup of the TSLR in charge of the development and application of the FIELD(TM) methodology.

Edmundo WERNA, ILO

PhD in development planning from the University of London (UK), Werna has worked for over 35 years on different aspects of the built environment and local development with particular attention to labour. Joined the ILO in 2004. One of his current responsibilities is to provide technical support to the Habitat III process on behalf of the ILO. He is also involved in ILO's partnership with the United Cities and Local Governments. Started his career in the 1980s working in field activities such as territorial planning and upgrading of low-income settlements. Prior to joining the ILO, designed and implemented the urban development agenda of UNDP's UN Volunteers Programme. Also undertook consultancies for several organizations, including local governments, WHO, European Commission, the World Bank, UN-Habitat, UNCDF/UNDP and also the ILO. The consultancies entailed different aspects of labour and local economic development.
